Bronx experiencing development boom

A number of development projects are bringing construction and jobs to the borough.

THE BRONX - The Bronx is having a development boom as of late, with a number of projects springing up across the borough.

The projects include a 780,000-square foot indoor mall, a new Marriot hotel and the Montefiore Medical Center. All the development means a boom in both construction and permanent jobs for The Bronx.

The mall, hotel and medical center are all expected to be completed by spring 2014.
